(6) SNAKE & LADDER:-

Requirement	objects
→ How many dice? → 1 → scrabble.	→ Dice.
→ How many Snake & Ladder. → It should be dynamic select.	→ Snake, Ladder.
	→ Board
	→ players
	→ Cells
→ winning Condition. → 1 player | all players	

SIMPLE EXPLAIN

① we have 100 size of board[][]. Contains 100 cells obj.

② we will add 5 snake & 5 ladders to the game board.

③ Each cell we add Jump object. Jump < start / end > snake/ladder

④ Run Snake/Ladder → common < start / end. So Instead of seperate Snake/Ladder < Jump.

⑤ Initialize board / Generate Random no < start / end. Add each to Jump & attach to cell

⑥ write Logic Run Game & execute.
