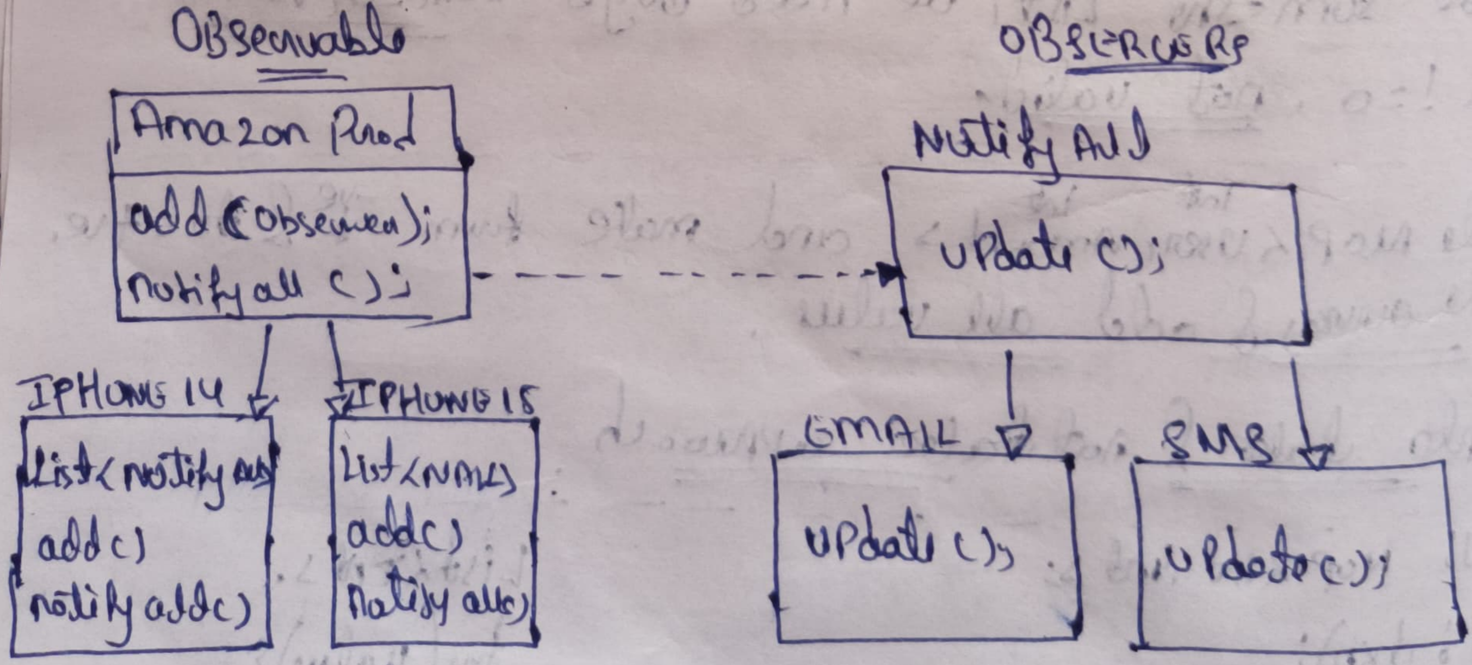
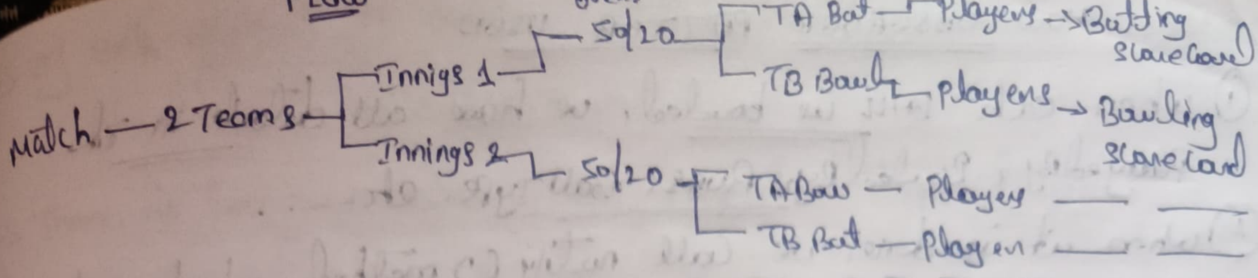
(15) CRICBUZZ :- OBSERVER DESIGN PATERN

-> Behavioural pattern that has 1->Many dependencies b/w objects.

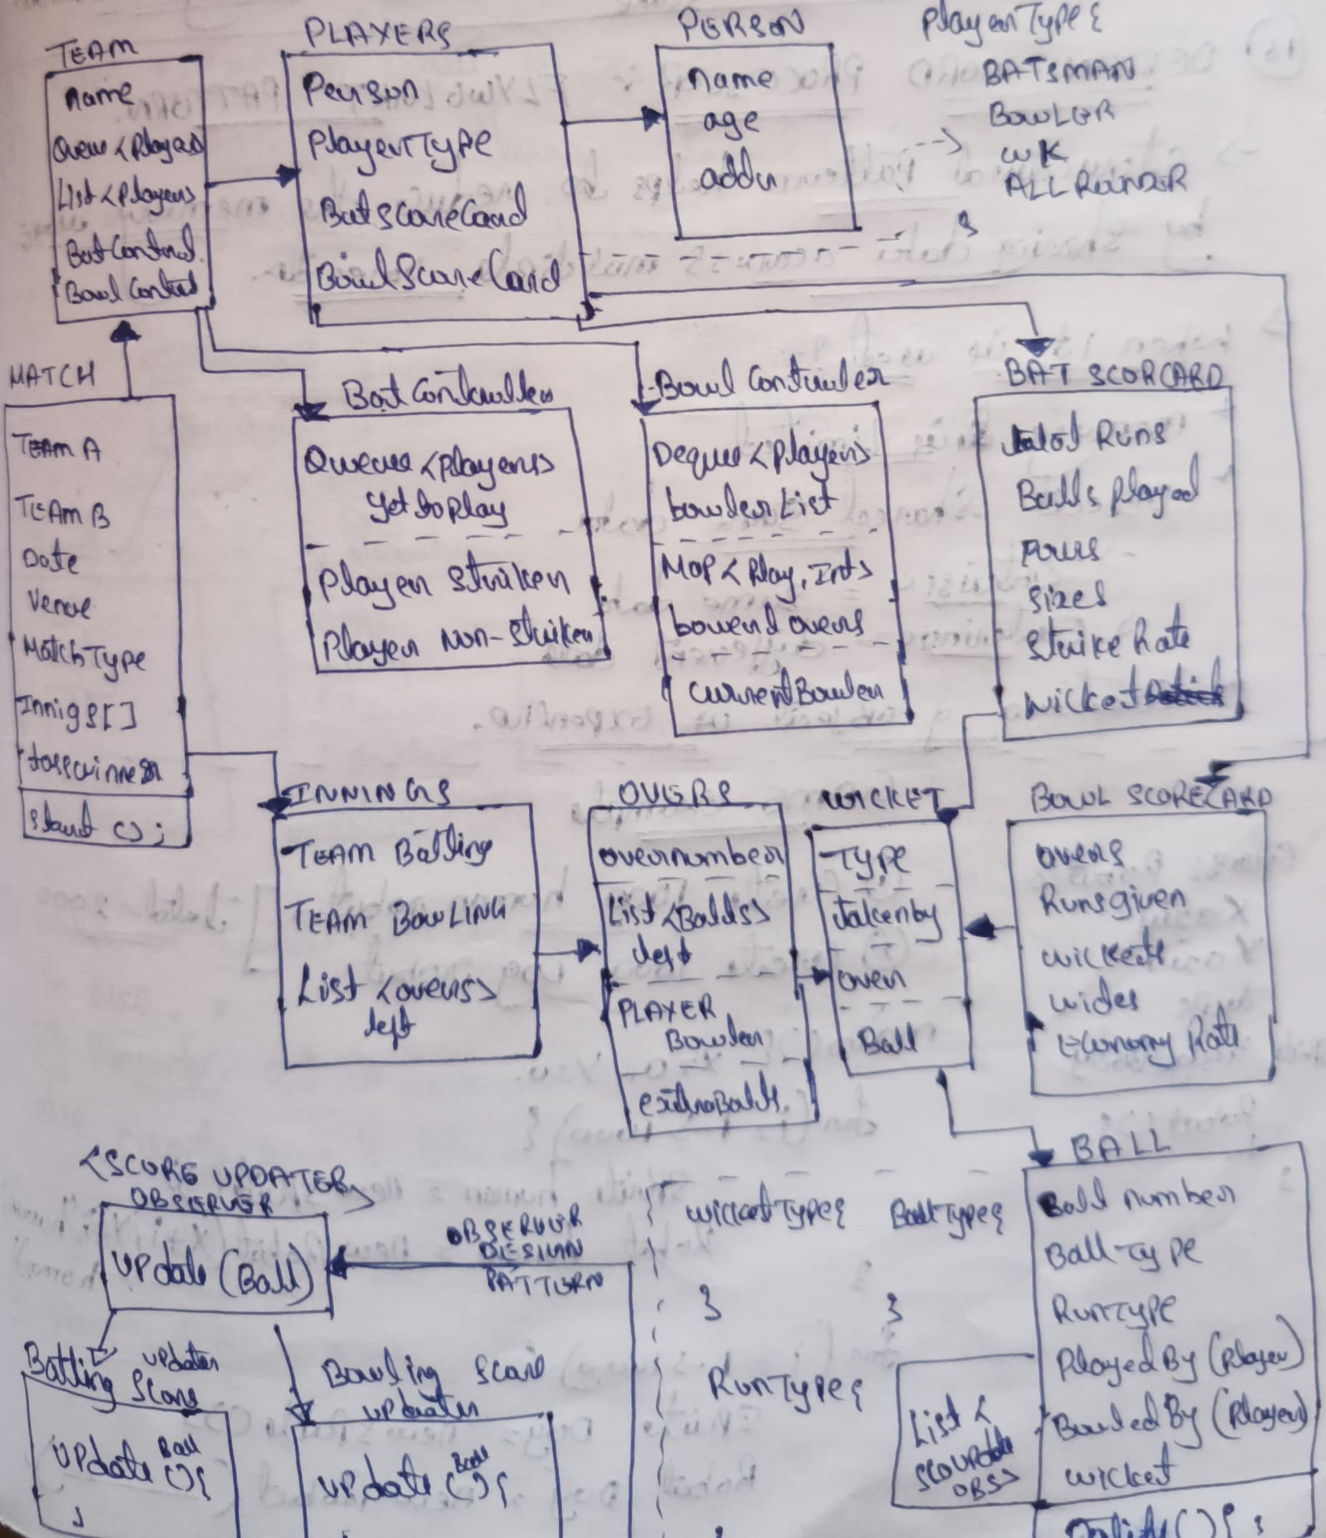
-> when state of an object change, all its dependents are notified & updated accordingly



FLOW



① Match ② Teams ③ Innings ④ overs ⑤ players ⑥ Score Card
⑦ Bowl



HOW OBSERVER PATTER USED

① when each BALL is bowled, we have all details in the PlayedBy, BowledBy, Runs, BallType, etc....

② when it is done, we call notify () method, which gets the Both Bowling & Batting USER & update their ScoreCard.

③ For each BALL, it will update the details.

---

④ we will update through PLAYERS, Batting & Bowling Controller
